

Market

Market Update:

Amidst the Pandemic and global meltdown, the total Marketcap of cryptocurrencies demonstrated its resilience and lack of correlation against the more traditional asset classes.

With both the S&P 500 and the Also 40 16% and 13% down from the yearly highs, Bitcoin is down 5%. Many experts in the traditional equity space and the crypto world predict that we will not have a 'V' shape recovery of the equities markets but rather a 'W' shape as there is still significant uncertainty as to the magnitude of the COVID-19 impact will have on the global economy.

Additionally,

- 1] Historical evidence,
- 2] Prominence of owners of Bitcoin as well as
- 3] The magnitude of inflows of capital into Bitcoin provide evidence of the bullish trend that Bitcoin has been within since its low of c. \$3k.

With the expectation that the Halving may be a Bullish event, there is a key defining moment in the short life of Bitcoin where we could experience a divergence in the correlations between Bitcoin and traditional equities.
